Date: 2024-06-17

| Client: | Name: | ThermoFLUX d.o.o |
|---------|-------|------------------|
|         |       |                  |

| Address: | Bage 3, 70101 Jajc | e, Bosnia and F | terzegovina |
|----------|--------------------|-----------------|-------------|
|----------|--------------------|-----------------|-------------|

Contact person: Amel Kopić

Manufacturer: Name: ThermoFLUX d.o.o

> Address: Bage 3, 70101 Jajce, Bosnia and Herzegovina

Test object: Product: DC Inverter Air Source Heat Pumps

> MONOBLOCK TF15 R290 CT 220V Model:

Trade mark: ThermoFLUX

Test specification: EN 14825:2022 **√** 

> EN 12102-1:2022 J 4 EN 14511-3:2022

4 EN 14511-4:2022 Clause 4

Purpose of Test according to the test specification

examination:

1 (EU) No 813/2013

**√** EU 2016/2282:2016-11-30

Test result: The test results show that the presented product is in compliance with the above

listed test specifications.

Any use for advertising purposes must be granted in writing. This technical report may only be quoted in full. This report is the result of a single examination of the object in question. It does not imply a general statement regarding the quality of products from regular production. For further details please see Testing, Certification, Validation and Verification Regulations, chapter A-3.3.

## **Description of the test object**

#### 1.1 **Function**

1.3

Manufacturer's specification for intended use:

The appliance is air to water heat pump.

Manufacturer's specification for predictive use:

According to user manual

#### 2 Order

#### 2.1 Date of Purchase Order, Customer's Reference

Date of Purchase Order: 2023-08-31, 2024-06-17

Customer's Reference: ThermoFLUX d.o.o

#### Test Sample(s) 2.2

2023-08-31 Reception date(s):

• Location(s) of reception:

For Energy test:

Guangzhou Customs District Technology Center

(CNAS accredited laboratory with Registration No.CNAS L2322)

Address: No.3, Desheng East Road, Daliang, Shunde District, Foshan, Guangdong, China

For Noise tests:

CVC Testing Technology Co., Ltd.

(CNAS accredited laboratory with Registration No.CNAS L0095)

Address: No.3, Tiantai Yilu, Kaitai Avenue, Science City, Guangzhou, Guangdong, China

completed and can be normal operation Condition of test sample(s):

#### Date(s) of Testing 2.3

2023-08-31 to 2023-10-30

#### 2.4 Location(s) of Testing

Same as 2.2

#### 2.5 Points of Non-compliance or Exceptions of the Test Procedure

N/A

#### 3 **Test Results**

| □ Decision rule according to ILAC-G8:09/2019 clause 4.2.1 Binary statement for simple |
|---|
| acceptance rule or IEC Guide 115:2023, clause 4.3 Simple acceptance was applied.      |
| ☐ Decision rule according to customer's requirements was applied. It is:              |

☐ Decision rule according to ILAC-G8:09/2019 clause 4.2.2 Binary statement with guard band guard band length = 95 % extended measurement uncertainty, was applied.

- ☐ Decision rule (based on ILAC-G8:09/2019 clause 4.2.3 Non-binary statement with guard band, guard band length = 95 % extended measurement uncertainty) for an upper specification limit (A lower limit or specification with an up-per and a lower limit is treated similarly.):
- · Compliance with the requirement: If a specification limit is not breached by a measurement result plus the expanded uncertainty with a 95% coverage probability, then compliance with the specification will be stated (e. g. Pass).
- Non-compliance with the requirement: If a specification limit is exceeded by the measurement result minus the expanded uncertainty with a 95% coverage probability, then non-compliance with the specification will be stated (e. g. Fail).
- Inconclusive result: If a measurement result plus/minus the expanded uncertainty with a 95 % coverage probability overlaps the limit it will be stated that it is not possible to state compliance or non-compliance.

| ☐ There are no statements to conformity | or no results | with measurand | stated in this | report, no |
|---|---------------|----------------|----------------|------------|
| decision rule has been applied.         |               |                |                |            |

### 3.1 Positive Test Results

See Appendix I

### 4 Remarks

### 4.1 General

The user manual has been examined according to the minimum requirements described in the product standard. The manufacturer is responsible for the accuracy of further particulars as well as of the composition and layout.

**4.2** When the product is placed on the market, it must be accompanied with safety Instructions written in official language of the country. The instructions shall give information regarding safe operation, installation and maintenance.

### 5 Documentation

- Appendix I: Test results
- · Appendix II: Marking plate
- · Appendix III: photo documentation
- · Appendix IV: Construction data form
- Appendix V: Test equipment list

### 6 Test History

- 1) These appliances are Air To Water Heat Pump Unit, each one including a whole compression type refrigerant circuit to heat water in another circuit. These appliances were for cooling and heating water function, this report only for heating capacity test.
- 2) The main power is supplied by a 3-pole supply cord connecting to fixed wiring.
- 3) Water enthalpy method was adopted in this report.
- 4) Standby mode power, off mode power and thermostat-off mode power were tested according to clause 12 of standard EN 14825:2022.
- 5) This test report 64.181.24.00496.01 Rev.00, dated 2024-06-17 bases on original test report 64.181.23.03117.01 Rev.00, dated 2023-11-07 to include the following changes and/or additions, which were considered technical modifications:
  - a) Changing report holder name and address, manufacturer name and address, trademark and model name.
  - b) After evaluating, no additional test was needed.

| Table 4. | Clause 4 of EN 14511-4:2022      | Р |
|----------|----------------------------------|---|
| Model:   | MONOBLOCK TF15 R290 CT 220V      |   |
| TEST 1   | STARTING TEST (§4.2.1.2 Table 3) |   |

Requirement: The "lower" starting operating conditions declared by the manufacturer for the heating modei.e. Tair= -25.03 °C, T in water = 9.17 °C, Flow rate 0.94 m³/h have been set and obtained. At those conditions, the machine was switched on.

Observation/ Evaluation: It started without any problem and worked for 30 minutes without showing any warning or alarm. During the test the machine operated in auto mode. No damage was recorded on the machine during and after the test.

Test Response: Pass

## TEST 2 OPERATING TEST (§4.2.1.2 Table 3)

Requirement: From the machine "lower" starting conditions - i.e. - the machine was brought to the lower operating conditions declared by the manufacturer for the heating mode- i.e. Tair= -25.01 °C, T in water = 50.75°C, Flow rate 0.94 m³/h. Once these conditions were obtained, the machine was let operate for over 1 hour in auto mode.

Observation/ Evaluation: During the test, no waring or alarm were showed. No damage was recorded on the machine during and after the test.

Test Response: Pass

## TEST 3 SHUTTING OFF WATER FLOW (§ 4.5)

Requirement: The water flow rate was shuted off through manual and automatic valves of the test rig. The machine switched off and only the flow switch Protection appeared on the user interface of indoor unit.

Observation/ Evaluation: Perform error reset operation, once the water flow rate was restored, the machine restarted automatically and worked for 30 minutes normally. No damage was recorded on the machine during and after the test.

Test Response: Pass

## TEST 4 SHUTTING OFF AIR FLOW (§ 4.5)

Requirement: The air flow rate was shutted off through a plastic sheet and a panel. The machine never turned off. It continued to operate with continuous frosting and defrosting cycles. After more than half an hour, the air flow rate was restored and the machine started to operate normally.

Observation/ Evaluation: During the test, no waring or alarm were showed. No damage was recorded on the machine during and after the test.

Test Response: Pass

### TEST 5 COMPLETE POWER SUPPLY FAILURE (§ 4.6)

Requirement: The power supply was cut off for about 5 seconds.

Observation/ Evaluation: The unit restarted automatically within about 3 minutes after the power supply was reactivated.

Test Response: Pass
